ACADEMIC EXPERIENCE

MAIN PROJECT TOPIC

Looking at the interaction between motivated reasoning and bounded rationality. More specifically, analysing whether reliance on heuristics provides individuals with a reasonable justification for reaching desired conclusions and whether motives might help to debias individuals.

BGSE | TEACHING ASSISTANT

Oct 2023 - Mar 2024 | Bonn, Germany

Assisting prof. H.M. von Gaudecker and prof. F. Zimmermann in the courses "Effective Programming Practices for Economists" and "Applied Microeconomics". The first course aims to teach basic software engineering principles with a focus on the Python language. The second course aims to enable students to judge the pros and cons of different ways to answer research questions by means of applied microeconomic methods.

IGIER | RESEARCH ASSISTANT
